

**DUNLOP PARK ANGUS STUD**  
**2012 SALE CATALOGUE**

**On Property Helmsman Auction**

Tuesday March 27<sup>th</sup>

11.30am

26 HBR Bulls, 2 APR Bulls  
12 PTIC Heifers

at

‘Dunlop Park’  
4938 Frankford Main Road  
Thirlstane, Tasmania 7307

To our Clients, Friends and fellow Cattle Breeders,

Welcome to the 2012 catalogue. In the early 2000's we chose a path in cattle breeding that has led us in a different direction from most herds in Australia. We felt that the great Australian cow herd was disappearing, being swamped by overseas genetics. It had been the foundation of the success of the Angus breed in Australia and we wanted to preserve some of its great features. We also believed that there would be a need for alternative bloodlines that could offer a genuine outcross for modern Angus herds. For this reason our breeding program has focused largely on Australian bloodlines, with a few strategic introductions from New Zealand and the UK.

This course has not been without its difficulties, breeding away from the main contemporary herd means fewer genetic links and with fewer progeny to assess means we can't generate particularly high Breedplan figures. Never the less a positive picture is emerging. Our cow herd has generally high calving ease, low birthweights, moderate frame and positive back fats, the classic Australian Angus traits. Such cows are true "easy doers", an often overused expression but one that genuinely fits our herd. They are cows that convert feed into calf weight and don't waste it on maintenance.

A good guide to how our cattle perform and produce profits are the returns from the sale of our steers in spring. We usually sell in spring because of our cropping program. Every year we get premium prices, this spring the steers aged 11 to 13 months sold at Quoiba to a top of \$845 and an average of \$826 per head.

This year we are pleased to offer for sale a range of bulls that will breed the type of animals needed for profitable beef production. Nearly half the bulls on offer are in the top 20% in Australia for low birth weight and many fit in the top 5%, there are bulls in the top 20% for calving ease and most have positive back fats again with a fair number in the top 20% in Australia. We were encouraged by our scanning results with some very good eye muscle areas recorded. You can find a bull with the genetics to suit any of the major Tasmanian requirements from within this year's draft.

We will also be offering 12 pregnancy-tested heifers for sale, a great opportunity to get a new outcross easy doing female line for your herd.

The bulls and females will be available for inspection on sale day, however you are most welcome to come and see them at any time prior to the sale. We look forward to see you on sale day.

*Best Wishes,  
The Stewart Family*

## **SALE INFORMATION**

### **Starting Time**

The sale will commence at 11.30am.

### **Inspection**

The Bulls will be yarded for Inspection from 10am on the Sale day. However we welcome inspection at any time.

### **Health and Veterinary**

All Bulls will be veterinary inspected by Dr. Jim Riley for breeding and structural soundness prior to the sale. The Females will be pregnancy tested.

Dunlop Park has Johne's disease MN2 status. Our herd is tested EBL free.

The bulls will be tested and vaccinated for pestivirus prior to the sale

Cattle are vaccinated annually with Ultravax 7 in 1. All animals are drenched at weaning with Cydectin.

### **Transport**

We will provide free transport for Bulls in Tasmania. Free transport to King Island, Flinders Island or Melbourne for lots selling for \$3,000 or more. Multiple by negotiation.

### **Rebate**

We offer a 4% rebate commission to outside agents introducing buyers in writing 24 hours prior to the sale and settling for same within 7 days of invoice.

### **Sale Conditions**

If any bull needs to be replaced a veterinary certificate must be provided to us. A full list of sale conditions can be found at the back of this catalogue.

### **Data available on Sale Day**

Scrotal circumference, current weight and growth rate information will be available at the sale.

### **Scan Date**

The bulls were scanned for carcass data on January 4<sup>th</sup> by Lonnie Stone.

### **Data in This Catalogue**

We try to present as much relevant data as we can and to do it in easy to read format. We are only human and mistakes sometimes occur. If you think we have made a mistake please ask us about it.

### **Abbreviations used in this Catalogue**

**EMA** is eye muscle area.

**IMF (Inter Muscular Fat)%** is a measure of marbling

**EBV** is estimated breeding value.

An **HBR** (Herd Book Register) bull is a registered stud bull.

An **APR** (Angus Performance Register) bull is a straight-bred Angus bull that is not eligible for recording as HBR.

**A complementary BBQ lunch will be available after the sale at Dunlop Park.**

## The Buyer Friendly Helmsman Auction System

Dunlop Park uses the Helmsman system to sell our cattle. This is a buyer friendly system that is becoming increasingly popular for stud sales both here and interstate.

The Dunlop Park Helmsman Auction will start at 1.30pm

### How It Works

- Buyers register in the same way as the old style auction.
- Lot numbers and starting prices are displayed on a board.

**Below** photo of the board at the start of the 2011 Dunlop Park Helmsman sale.

- When the sale starts all lots are on the market at the same time.
- The sale will last for at least twenty minutes.
- Buyers can bid on any lot during this time.
- Livestock agents in the crowd will take your bid.
- You can open bidding at the price displayed on the board, your registration number will be displayed next to the lot you are bidding on.
- If a lot already has a buyer's number alongside it, you can place a higher bid
- You can bid on more than one lot at any time if you wish.
- Once you have submitted a bid it cannot be retracted, and the person submitting such a bid will be responsible for it until it is overbid.
- At the end of the twenty minutes sale time if there have been no new bids in the last two minutes the sale will conclude. If a bid was registered in the last 2 minutes then there will be a 2-minute extension of the selling time. Further 2-minute extensions are made after any new bid.
- The sale finishes when there are no further bids within a 2-minute extension period or at the discretion of the auctioneer.

The beauty of the helmsman auction is that if you are outbid on a lot then you can pick another lot to bid on. There is no pressure when you are making your bids and you have time to go back to the inspection paddock and look at the bulls if you need to.

## **The Dunlop Park Cow Herd**

The Dunlop Park cow herd offers a rare resource for Australian Angus breeders, it has a high proportion of Australian bloodlines and is bred to retain the features of the Australian cow herd which have been the strong foundation for the success of the Angus breed today.

Our cow families line back to iconic Australian herds such as Springvale, Creekton, Victoree, Terinallum, Kahlua, Currawidgen (sister herd to Wallah) and Wambanumbah.

### **Cow Families with offspring in the 2012 Sale**

**Canella:** The Dunlop Park Canella family started with a mating between the Ellen family (see below) and Kenalta McHenry a Canadian AI sire.

**Dora:** The Dora Line derives from the Springvale Floryx family. The first Dunlop Park Dora D61 was a grand-daughter of Noranda Glowman.

**Ellen:** The Ellen line derives from the Springvale Ellinda family. The first Dunlop Park Ellen (X32) was a daughter of Burn Tally (Wambanumba breeding).

**Ellice:** The Ellice family comes from the Springvale Ellinda family.

**Esther:** The Esther family was started with the purchase of Victoree Esther G9 (ET) at the Landfall sale in 1988. G9 was the daughter of F.Nichols Hallmark R225 (Imp. USA) and Summitcrest Ester R073 (Imp. USA). The Esther line has frame and growth and has bred many outstanding sites over the years.

**Evita:** The Evita family derives from the Springvale Eleeta Family. Randolph R22, one of our most outstanding Stud sires, was a son of Evita J2 and New Trend 802.

**Floryx:** The Floryx line is a continuation of the Springvale Floryx family, all Floryx's descending from Springvale Floryx U31. The Springvale Floryx line in turn goes back to the Springvale Pearl line and before that the Terinallum Pearl line.

**Florry:** All Florry's are descended from Springvale Floryx 2nd (mother of Springvale Floryx U31) and before that the Terinallum Pearl line.

**Glisper:** The Glisper family was started with a mating of the Springvale Questina family and the Wambanumba line (Burn Tally).

**Linda:** The Linda family comes from the Springvale Ellinda family. This line was also strongly influenced on the sire side by the Springvale Spartan family. The Springvale Spartan family was descended from the Terinallum Spara family. The first Linda and matron to the line was a daughter of Xavier X17 the son of Springvale Spartan F4.

**Lynier ad Lynne:** The Lynier and Lynne families were started with the purchase in the early 1980's of Merrigrange Lynnette V14. The first Dunlop Park Lynier (a daughter of V14) had the Springvale Spartan family on the sire side.

**Merry and Merry Maid:** The Merry and Merrymaid families are descended from the Springvale Meromest family.

**Pearl:** The Dunlop Park Pearl line was started with a mating of the Springvale Floryx line with Noranda Glowman. The Springvale Floryx line in turn goes back to the Springvale Pearl line and before that the Terinallum Pearl line.

**Pretty Maid and Pretty Pride:** Pretty Maid and Pretty Pride were mother and daughter and are a branch of the Merry Maid family.

**Starlight and Stardust:** The Starlight and Stardust families are descendants of Springvale Stardance L2. All Starlights are descended from a mating of L2 with Wambanumba Sterling and all Stardust from a mating of L2 with Burn Tally.

**Umbra:** The Dunlop Park Umbra family began with two females purchased at the Creekton dispersal sale in 2004; mother and daughter Umbra M12 and Umbra X59.

**Wendy:** The Dunlop Park Wendy Family is descended from the Springvale Floryx Family.

**Wenlock:** The Wenlock family is a branch of the Wendy family.

**Wingin:** The Wingin family comes from the Springvale Wyeeta family which in turn came from the Wambanumba Wyeeta family. Like most Springvale female families the Wyeeta line had Currawidgen Katindy and Terinallum Brigand infused into it.

**Zinnia:** Metro Zinnia C30 was purchased with a calf at foot at the dispersal of Bryan Grey's Howick stud. The calf at foot was a son of Hoff Valedictorian SC 925 (Howick Madrid M54) and he was subsequently used as a stud sire. Zinnia also proved to be a useful purchase and she was retained in the herd and is matron to a good line of females. Zinnia was bred by the Metro Stud of the Melbourne and Metro Board of Works and is a daughter of Stern Black Power 426 (Imp NZ). The Zinnia family, like many others in the Dunlop Park herd, lines back to the Terinallum herd.

## **Information Presented in this catalogue**

Performance data and breedplan EBV's are both presented in this catalogue for several reasons

\*Some buyers prefer actual data, others EBV's

\* an animal's actual performance (phenotype) has always been a good guide to what the performance of its progeny will be under the same conditions.

\*Some animals don't have EBV's available at present (they will be available in March).

All available EBV's (estimated breeding values) are presented in a table at the back of this catalogue. We have made the assumption that all cattle producers now know what an EBV is, if not please ask, there is however plenty of information available.

Growth rates are presented for weaning (average age 250 days), spring 2012 (average age 413 days) and scanning (average age 499days).

The actual EMA (eye muscle area) information is presented as an index (a simple division of actual EMA by the animal's weight to give a value per100kg) as we personally feel that this is a good guide to the animal's breeding potential. If you don't agree the actual recorded EMA is in a table at the back of this catalogue. We feel that any value above 16 is very good.

## **Conditions of Sale by Auction**

1. The highest bidder for each lot shall be the purchaser thereof subject to any reserve price and, in the event of any dispute arising as to any bidding, the lot in respect of which the disputes arises shall be immediately put up for sale again at the last undisputed bidding or the dispute may be determined by the auctioneer whose decision shall be final.
2. The auctioneer may, without giving any reason therefore, refuse to accept the bidding of any person or persons.
3. No person shall advance less of a bid than the sum named from time to time by the auctioneer.
4. The Vendor reserves to himself one bid or the fixing of a reserve price.
5. Each lot shall be at the purchaser's risk from the fall of the hammer irrespective of any delivery instructions given to the auctioneers, their employees or agents and must (except as hereinafter provided) be paid in full in cash without discount before the delivery and must be taken away by the purchaser at his own expense at the conclusion of the sale. The Vendor shall be responsible for the count to the purchaser.
6. Each lot is offered with all faults and no warranty of any kind is given or implied. The purchaser must satisfy himself by inspection or otherwise as to age, condition and soundness prior to bidding. No error or misdescription shall invalidate any sale or give rise to any claim for compensation.
7. Unless otherwise stipulated by the auctioneer, at the commencement of the sale, all lots shall be sold for cash.
8. No purchaser at any sale who fails to comply with any of these conditions shall be entitled to delivery of any stock purchased at such sale or any subsequent sales unless and until he shall have made good his default and shall have obtained from the auctioneer a written order for delivery of such stock and presented such order to the auctioneer's agent at the sale yards.
9. Any lots not cleared in accordance with these conditions may, if the auctioneers think fit, at any time thereafter be resold by the auctioneers either by auction or by private contact any diminution in the price on such resale together with the other expenses thereof shall be a debt due by the original purchaser to the Vendor and recoverable accordingly.
10. Interest at the rate from time to time charged by the auctioneer shall be paid in any case where a purchaser makes default on due payment.
11. All live and dead stock yarded at any sale shall be subject to commission at the rate from time to time charged by the auctioneers whether on the day of the sale or promptly thereafter.
12. The auctioneers shall not be responsible for any payment to any Vendor if such Vendor gives delivery without the written consent of the auctioneers or if the purchaser fails to make payment or other satisfactory settlement in accordance with these conditions.
13. Lots will not necessarily be offered in numerical order.
14. The purchaser authorises the auctioneer, and / or the auctioneer's clerk to sign the Contract of sale on his or her behalf.

### **NOTICE UNDER SECTION 16 OF THE AUCTIONEERS AND REAL ESTATE AGENTS ACT 1991 Certain bidding agreements are unlawful**

Section 13 of the Act makes it offence:

- for a dealer ( being a person who in the normal course of business attends auctions for the purpose of purchasing property for resale) to give, agree to give or offer a gift or consideration to a person as an inducement or reward for abstaining or having abstained from bidding at an auction. ( Maximum penalty \$5,000).
- for a person to accept, agree to accept or attempt to obtain a dealer a gift or consideration for abstaining or having abstained from bidding at an auction. (Maximum penalty \$5,000).

If, however, before an auction a dealer enters into an agreement with a person to purchase property at the auction bona fide on a joint account and has deposited a copy of the agreement with the auctioneer then that agreement is not lawful.

### **Collusive practices at auctions are unlawful.**

Section 14 of the Acts makes it an offence:

- for a person, by means of an unlawful promise made to another person at an auction, to induce or attempt to induce that person to abstain from bidding (either generally or for any particular lot) or not bid (except to a limited extent) or to do any other act or thing which may in any way prevent or tend to prevent free and open competition. (Maximum penalty \$5,000)
- for a person, as a result of an unlawful promise made to that person to abstain or agree to abstain from bidding ( either generally or for any particular lot) or not to bid (except to a limited extent) or to do any other act or thing which may in any way prevent or tend to prevent free and open competition. ( Maximum penalty \$5000).

An unlawful promise is an express or implied promise made by a person that if that person is the successful bidder in respect of property sold at an auction:

- (a) The person to whom the promise is made will have the right to elect through the auctioneer to take over as purchaser of the property or any part of the property at the auction price : or
- (b) The ownership of the property or any part of the property will be decided by a specified method.

### **Successful bidders must supply certain information to the auctioneer.**

Section 15 of the Act requires a person who takes the successful bid at an auction to give the auctioneer, as soon as practicable after the acceptance of that bid :

- (a) If the person bid on his or her own behalf - his or her name and address; or
- (b) If the person bid on behalf of another person - the name and address of that other person.

The maximum penalty for failing to comply with requirements is \$2,000. A person who makes the successful bid at an auction does not have to comply with this section of the Act if he or she has previously given the required information to the auctioneer.
